Cambridge Programme
For Sustainability Leadership

The Masters in Conservation Leadership is a ground-breaking course at the University of Cambridge.

The **unique** feature of this course is its delivery by a collaboration between six University departments and nine leading conservation organisations that comprise the *Cambridge Conservation Initiative*.

This full-time, 11-month postgraduate degree course equips experienced professionals with the skills they need to become **significant leaders** in conservation, covering a range of subjects including : *Conservation Problems and Practice, Communications, Management, Governance, Enterprise and Innovation for Conservation*.

MPhil in Conservation Leadership students also undertake a **group consultancy project**, and an individual **professional placement**.

"This Masters more than met my expectations! I really enjoyed all taught aspects of the course, while the placement offered an opportunity to put all the skills learnt before and on the course into practice."

Conservation Leadership Alumnus, 2010-11
